COP 21
Paris, 2015
December 5th
COP 21: THE PARIS CLIMATE ALLIANCE

GOALS

1) Get a universal, fair and binding agreement
2) Mobilize civil society

1. New universal agreement
   The legal agreement that will be signed by governments will come into force in 2020 and will be applicable to all.

2. Country contributions
   As well as signing the universal agreement, countries are submitting their own individual contributions, in advance of Paris, to demonstrate commitment to a common objective.

3. Mobilization of Finance
   In order to fund the transition to low carbon and resilient activities, finance has to be mobilized from public and private sources.

4. The Action Agenda
   The Action Agenda showcases climate actions and commitments from business and other non-state actors and supports an agreement in Paris.

What analysis for the Paris agreement?

Brice LALONDE, Special Advisor
United Nations Global Compact
1- A NEW UNIVERSAL AGREEMENT

The aim: to keep the increase in global average temperature to well below 2°C and to 1.5°C if possible.

The objective: to level off greenhouse gas emissions as soon as possible.

The principal: to differentiate between developed and developing countries. Developed countries must lead the way for reduction of emissions and support developing countries in implementing this. Other countries with the ability to do so may also contribute their support on a voluntary basis to achieve this target.

The means: Countries must submit Intended Nationally Determined Contributions (INDCs) which are revised upwards every 5 years. The 1st report is due in 2023. North-South technology transfer.

The financing: from 2020, rich countries must contribute at least $100 billion per year. This amount will be reviewed in 2025.

The new mechanism: loss and damage. Measures must be taken to avert, minimize and address the concrete effects of climate change, in order to help the most vulnerable countries.

Entry into force: 2020 if the Agreement is ratified by 55 countries accounting for 55% of global greenhouse gas emissions.

Which consequences for companies?

Lila KARBASSI, Head of Environment and Climate
United Nations Global Compact
Caring for Climate: An Urgent Priority

91% of business leaders believe that climate change is an urgent priority for business.
66% believe business is not doing enough to tackle climate change.
34% believe progress is on track to restrict global warming to less than 2°C.

750 business leaders surveyed
41 industry sectors
152 countries

@GlobalCompactFR
#Caring4Climate
#COP21
ENGAGEMENTS OF COMPANIES

1. Unprecedented mobilization of business

2. Collaborative Business Initiatives on Climate

3. COP21 sent a strong signal for a transition to a low carbon economy
OUTLOOK FOR COMPANIES

- **22 avril** - Signing of the agreement by States
- **22 and 23 June** – Global Compact Summit
- **27-28 June** - Business & Climate Summit 2
- **13 septembre** - Private Sector Forum / UN General Assembly
- **7-18 novembre** - COP 22 (Morocco)

Link with SDGs
